

ATF manufacture both flameproof and non-flameproof electrical systems for auxiliary ventilation fans.

ATF can also perform complete overhauls of fans, including electrical and mechanical aspects.

Our fan offering includes:

- IECEx certified enclosures and components (flameproof version)
- IP65 rated enclosures (non-flameproof version)
- Extensive control options from relay logic or fan control relays to PLC control
- Electrical designs to suit your specific requirements
- Multiple enclosure sizes and options to suit the application
- AS/NZS3800 flameproof overhaul of the electrical system
- Mechanical inspections and testing of the vanes, dilution valve, impellor etc.
- Workshop testing prior to dispatch including temperature rise and vibration testing
- Mines department Guideline and Australian Standard Audits
- Gas systems

ATF have over 25 years experience with various fan manufacturers.
