

CABLE MANAGEMENT

CableTrack is a secure, online database which ensures cable assets are easy to manage and maintain. Taking the hassle out of maintaining a cable register, CableTrack is dynamic and backed up daily to ensure your data is secure.

The system is designed to meet the needs of cable customers and aims to help manage statutory compliance. The database is mobile compatible, enabling fast data retrieval on any CableTrack cable.

CableTrack also records the history of every cable on site, helping you manage your cable assets more effectively.

How to connect

CableTrack is provided as part of a fixed term maintenance agreement. Partnering with Ampcontrol ensures cable reliability and peace of mind that cable support is there when you need it.

Contact us

For a site demonstration of CableTrack and a discussion on your cable requirements, contact support@cabletrack.com or phone 1300 267 373.

Features

-  Provides easy compliance with required cable history records
-  Real time data record keeping
-  Secure data which is backed up daily
-  Automatic upload of all Ampcontrol managed cables
-  View all site cables from one platform, including cable documentation and information
-  Upload test certificates and reports
-  CableTrack captures every cable entry change via history records
-  Easy data management system for Ampcontrol customers

CABLE MANAGEMENT

Why prevention is better

For underground coal mines, AS/NZS 2290 is very clear on the scheduled maintenance requirements of cable assets. All readily accessible machine cables and glands must be inspected daily, with pre-overhaul audits conducted every three years and AS/NZ 3800 overhauls every four years.

For other industries, including above ground mining, continuous monitoring of cable assets outside of planned maintenance periods can ensure your cables don't undergo any 'unscheduled' maintenance.

What is involved?

Securing Ampcontrol's experienced field service technicians via a fixed term agreement typically begins with an assessment of your cable assets. From this initial audit, the CableTrack database is created, complete with attached test reports.

Ongoing use of CableTrack, including the addition of new data is managed entirely by you. Any maintenance done by Ampcontrol is automatically updated in CableTrack.

Peace of mind

Ampcontrol takes it roles as a service provider to the mining industry very seriously. Over several decades we have invested significantly in the delivery of leading cable support via our workshops across NSW and QLD.

Engaging in a service agreement with Ampcontrol enables a more cost effective, proactive approach to cable management, made even easier through CableTrack.

With your cable assets online, an experienced cable technician can fast track the repair process by understanding the previous service history. Site wide management of cables becomes easier with all cables readily locatable via a click of a button.

Maintaining the data is simple, with onsite training provided to sites where multiple users will be onboarded.

Support 24/7

We take customer support seriously, so available 24/7 means exactly that. Any time of the day or night, you can connect with someone at Ampcontrol.

Cable Management Services

Depending on your site needs, Ampcontrol can carry out:

- HV splices, in-line joints and terminations
- Terminations to 33kV and plug fitting and supply (up to 22kV)
- Onsite or workshop repairs and testing
- Onsite cable relocation via custom cable reeler trucks
- Warehousing of spare cables
- Hire agreements for short/long term cable supply
- MV to HV repairs including fibre optic, rubber, trailing, reeling and composite cables
- Confined space cable repairs
- Buried services and fault location

Regional Service Centres

So we can provide fast, effective service when and where you need it, Ampcontrol has six regional service centres across NSW and QLD.

Able to provide agile response to any customer requirement, from engineering to field service and breakdown support, Ampcontrol is located in -

NSW

Thornton
Lithgow
Illawarra

QLD
