

COMMISSIONING SUPPORT SERVICES

Ampcontrol's specialist technical support teams can provide commissioning support for a range of OEM electrical and electronic equipment.

As the OEM we know the most efficient and safe installation methods for our products and provide the best solution to commission new equipment or return existing equipment to site.

Our services include:

- OEM support for Ampcontrol electronic relays and systems (IPD, OCS, iMAC VoiceCom, Gasguard)
- Equipment 'introduction to site' and return to service management
- Internal inspections as per AS2290 (pre-power inspection) and power on commissioning as per OEM and system specifications
- Provision of commissioning documentation and management installation checks, pre-power and commissioning

- Specific system commissioning and initial start-up support
- Safety system (SIL) commissioning
 - Fault diagnostics and repair (including re-validation)
 - Time phased proof testing
- Protection audits and relay testing
- Automation support and assistance.
